

Curriculum intent: GCSE and A Level Psychology will give pupils a broad understanding of how the human mind influences behaviour. Pupils will be able to apply their knowledge and skills in their everyday lives.

Curriculum rationale: We have chosen this sequence of knowledge and skills because it allows pupils to learn threshold concepts such as research methods and evaluation key terms early on in the course so they can apply this to studies and theories learnt in other topics. The order also helps pupils to build their knowledge of scientific concepts such as the brain.
