

## Geography Curriculum Overview

**Curriculum intent:** Our intent is that through the knowledge that they acquire in Geography they become more rounded individuals who understand the world in which they live in, how it works and ultimately can make a positive contribution to it. This is students having a clear understanding of their positionality within the world. We aim for them to think like geographers and understand how the world has developed and changed. We want our students to understand how human actions have impacted the planet and how they can be prepared for the world of tomorrow, creating a global citizen. We want our students to have a curiosity and fascination with Geography.

**Curriculum rationale:** The Geography curriculum allows us to investigate the world around us by looking at different places, cultures, and landscapes. We are able to consider our own place in the world and learn skills that will benefit them in their future careers.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 7	Investigating my world	Population and urbanisation	Weather and climate	Job sectors	Job sectors	Climate change
