

YOU SAID, WE DID

Parent Advisory Board

Parents Said	We Did
Can there be more information at an earlier point in the year about Year 9 options to allow pupils the most amount of time possible to speak to teachers and gain in-depth information about subject possibilities?	There were an increased number of options assemblies this academic year, as well as an options evening combined with Progress Evening for year 9. Next year this process will start even earlier to increase time pupils can make their decision.
Are you educating pupils on the positive use of AI?	Matrix Academy Trust has purchased comprehensive software to identify when pupils have used AI to generate responses which should be written individually, which pupils have been informed off. There are to be more assemblies and education in lessons on the positive uses of AI, so pupils understand the advantages of using AI appropriately. Parents with experience of AI will be consulted in this process.
