

# YOU SAID, WE DID

## Parent Advisory Board

Parents Said	We Did
Parents felt it would be beneficial for the school to introduce a post-meeting survey following parental consultation meetings. This would enable families to share both qualitative feedback and quantitative responses, allowing the school to evaluate parental views and identify areas for further improvement in our provision.	A post-meeting parent survey will be introduced from the beginning of May, following the completion of the parental consultation meetings.
Parents welcomed the improvements made to the clarity of curriculum information on the school website and requested that this continued to be developed.	At the end of this academic year, the curriculum section of the website will be comprehensively reviewed and updated to ensure it accurately reflects the teaching and learning taking place across the school.
